

A NOTE FROM THE ARTIST

The Power of Two

The wide array of images you will find on my website shows you where I have been and what I have seen over the past 30-plus years right up to the present. They document my passage in this world. They form my visual biography. In each image, I am always the invisible presence looking and recording what is in front of me. We are the power of two, my subject and I, locked together in seconds of stillness within a click of the shutter. I am also the curious eye that explores the image in my Photoshop darkroom to discover my subject's inner self and I empower it to be. Within this bonding, there is love.

The Power of Three

You, in the present, are the third part in the equation of time and space -- browsing my portfolios, seeing images from my life as I am touched and changed by my subjects along the journey to today. Then is Now and always will be. The magic moment is eternal. Welcome to my world. Welcome to my life!
